

CLIMATE

ENGAGEMENT

Outside the Box is engaging with communities, focusing on Climate Action and the Climate Emergency

Individuals and communities cannot fix the climate emergency alone because it also needs businesses, industry, national and local governments to take action to ensure Scotland meets its targets. However, we can still help by taking our own small and everyday actions, and by pressuring our politicians and services to do more.

Scan the QR code to complete our short questionnaire to help us develop the resources and conversations we will have over the coming months
